RE: AgLogic Chemical, LLC – AgLogic 15GG-OG (EPA File Symbol 87895-xx)
Application for New Pesticide Registration
PRIA Category R170

Dear Ms. Adeeb,

On behalf of AgLogic Chemical, LLC please find the enclosed application for registration of AgLogic 15GG-OG (EPA File Symbol 87895-xx), an end use product containing the active ingredient aldicarb for use on oranges and grapefruit in Florida.

This application for registration is being submitted based on the Dec. 14, 2020 conference call between AgLogic Chemical, LLC and EPA's Invertebrate-Vertebrate Branch 2. Based on these discussions, the Agency requested submission of a new product registration. The terms of registration will be as follows:

- This product will be restricted to use on oranges and grapefruit in Florida only.
- A note to the reviewer on the product label explains that the registration expires on May 31, 2023.
- The sales and distribution cap is set at no more than 2.5 million lbs AgLogic 15GG-OG annually which may be used to treat up to 100,000 acres.

AgLogic Chemical, LLC will be responsible for the product stewardship program which will include the following:

- AgLogic 15GG-OG will be packed in 33 lb boxes and each box will be identified with a unique barcode and can be tracked throughout the distribution chain to the end user and field in which it is applied.
- The total pounds of AgLogic 15GG-OG and the total acres of oranges and grapefruit treated will be reported to EPA at the conclusion of each use season (after May 31, 2021).
- Applications will be monitored by personnel employed or contracted by AgLogic Chemical, LLC to inspect application sites, locate drinking water wells, mark appropriate setbacks, and ensure applications are in compliance with label directions for use.
- Growers and applicators must complete AgLogic Chemical's on-line stewardship certification course before they will be allowed to purchase of AgLogic 15GG-OG.
- All applicators must be licensed (certified) to apply restricted use pesticides.

- Application intent notices must be completed and permits to apply aldicarb must be approved by the Florida Department of Agriculture & Consumer Services (FDACS) prior to application.

In support of this label amendment, the following documents are enclosed:

1. Application for Pesticide Registration (EPA Form 8570-1)
2. Confidential Statement of Formula for the Basic & Alternate #1 Formulations dated Dec. 10, 2020 (EPA Form 8570-4)
3. Proposed label
4. Certification with Respect to Citation of Data (EPA Form 8570-34)
5. Agency Internal Use Data Matrix (EPA Form 8570-35)
6. Public File Copy of the Data Matrix (EPA Form 8570-35)
7. Letter of Authorization from AgLogic Chemical, LLC

This action falls under PRIA category R170 and is linked to the label amendment of AgLogic 15GG, EPA Reg. No. 87895-4 (D-549657) which was submitted on April 9, 2019. Since this new product registration was requested by the Agency, no additional PRIA fees are required.

Please feel free to contact me by phone (253) 853-7369 or e-mail Ann@PyxisRC.com if you have any questions or need any additional information.

Sincerely,

Ann M. Tillman, Ph.D.
